BIO

I **love writing algorithms** in my spare time, therefore I applied to the competitive Founders & Coders (FAC) bootcamp to pursue a career as a full-stack JavaScript Developer.

I **volunteer as a mentor** for prospect students at FAC. You can also **find me at various meetups**, such as London Node.js User Group, TAQFull(Technology, Agility & Quality), and London Tech Ladies.

I also **like hackathons**. Currently, I am preparing for the Code Untapped Diversity Hackathon (15th Sep), as well as EITFoodChangeMakers: Food and Environment Hackathon (5-6th October).

I am **committed to building software, tackling challenges and achieving goals**. My objective is to join a friendly team and **work towards clever and elegant solutions**.

TECH-STACK

EMPLOYMENT

STAFF NURSE – CRITICAL CARE/ ITU

RBHT NHS FOUNDATION TRUST | OCT 2017 – JUN 2019 | LONDON, UK
